

## Company: Huevos Guillén, S.L.

The egg is one of the most complete foods due to its nutritional properties, its price, accessibility and versatility, aspects that mark current consumer trends. The egg has gained prominence in the menus of Spanish homes in recent years, and is the main ingredient in 3 of the 15 most cooked dishes. Deeply rooted in our gastronomic culture, it is consolidated as a universal food in Spain, present in 98% of homes.

The Spanish consumer gives a priority value to freshness when buying eggs, perceived as a determining factor in quality, along with other factors such as the absence of internal defects (internal stains) and external (cracks, dirt).

Therefore, from Huevos Guillén, committed to improve every detail, we are **focused on finding a solution that, in an integrated way, allows the detection, separation and elimination of the process of all the eggs considered unsuitable for the final consumer.**
