

DESCRIPTION OF THE CHALLENGE

CHALLENGE

8.1 - Batch identification system in high-temperature production process

SUMMARY

We are looking for a solution company for...

- Integrating an identification system (QR type or similar) that allows tracing the manufacturing batches throughout the production process, including the stages at temperatures close to 500°C.

HOW COULD WE

Get a solution...

- To allow us to trace the manufacturing batches in the production process, including the high temperature stages.
- That it could be attached to the aluminum surface, for example a QR type label.
- And that it is easy to attach and remove from the aluminum surface to which it will be attached, so that it can be attached and removed several times during the process.

REQUIREMENTS

The company must...

- Ensure that the solution can withstand high temperatures.
