

## Company: ASAC Pharma, S.L.

### FORMULATION OF THE CHALLENGE

#### CHALLENGE

17.2 - Design of an installation for the management of wastewater from the production process.

#### SUMMARY

##### We are looking for a solution company for...

Designing an installation so that the water from cleaning the production equipment meets the parameters for discharge into the general sewer system.

#### HOW COULD WE

##### Get a solution...

- That allows to clean the water of the remains of the fabrications, generating the least possible amount of residue,
- That the installation be
  - 100% automatized, clean (according to the pharmaceutical industry) and with low energy consumption and low cost,
  - That its assembly is fast and clean and that it occupies a limited space or is suitable for outdoor use,
  - Low maintenance.

#### REQUIREMENTS

##### The company must...

- Ensure low risk of spillage.
- Ensure compliance with sewage discharge regulations.
