

## DESCRIPTION OF THE CHALLENGE

### CHALLENGE

18- Optimization of storage management and internal logistics to anticipate demand growth.

### SUMMARY

#### We are looking for a solution company for...

Integrating logistics management of warehousing facilities to meet an exponential market increase.

### HOW COULD WE

#### Get a solution...

- That can optimize:
  - The storage of raw materials, spare parts, components and final product.
  - Internal logistics (from supplier to factory).
  - External logistics (from factory to customers).
- Thanks to the prediction of demand (using artificial intelligence, for example) that allows to adjust the management of storage and logistics.

### REQUIREMENTS

#### The company must...

- Specify the execution time of the challenge and make an economic proposal.
- Ensure that it integrates with the company's current information systems. For example, compatibility with the company's quality and security systems (ISO).
