

DESCRIPTION OF THE CHALLENGE

CHALLENGE

22.1 - Implementation of renewable energies, thanks to new generation alternatives.

SUMMARY

We are looking for a solution company for...

- Implementing new energy solutions based on renewables sources using state-of-the-art technologies to achieve impactful results in terms of sustainability.

Location: :

<https://goo.gl/maps/66zKMtr7nGTA7w7M8>

HOW COULD WE

Get a solution...

- To allow the implementation of new installation(s) for the production of energy from renewable sources. The production site has the following characteristics:
 - Close to the sea.
 - Surrounded by orchards.
 - With residential neighborhoods.
 - And with very little usable roof area.
- That respects the landscape.
- That can be complemented with the current photovoltaic installation.

REQUIREMENTS

The company must...

- Ensure that the solution does not involve high levels of noise, odors and other negative effects on the environment and annoying for the neighborhood.
- Ensure that the solution complies with the restrictions of the plant for being listed as BRL (Bien de Relevancia Local) in the catalog of protected rural assets and spaces.
